

On this planet you find an exclusive right:
The Last Request assigned to those about to be
executed.

Due to a decline in the number of executions during the
past centuries The Last Request is in danger of extinction.

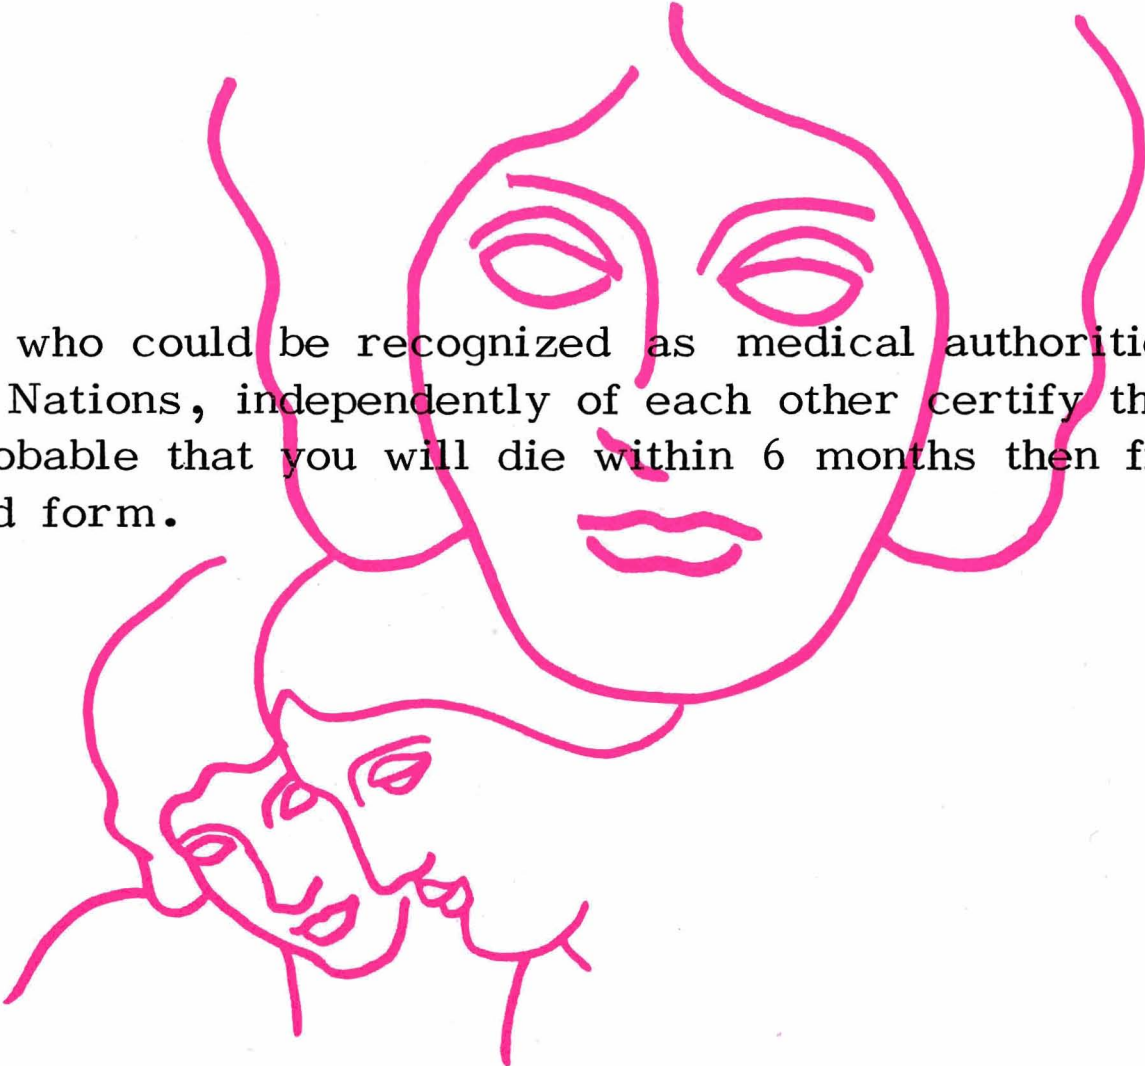

Being an exclusive right all attempts should be made by mankind
to preserve this privilege or even extend the right to all human
beings.

I propose The Last Request to be accepted as a human right guaranteed by all national and international agencies.

I call on all nations and united nations to guarantee The Last Request and to state this right of the people explicitly in their Constitutions, Statements, Manifestos and Charters.

Until that time I invite you to call on me for Your Last Request.
